#### SYLLABUS FOR B.ARCH. (5 YEARS DEGREE COURSE)

## 9AR1: PROFESSIONAL PRACTICE & MGMT.

# **B.ARCH.:** 9<sup>th</sup> Semester

Max. Marks: 100

UNIT	CONTENTS	CONTACT HOURS
Ι	Architect's Office & Its administration:	04
	Nature of profession, difference between trade, business and profession, Office setup and administration.	
	Office organization, proprietorship, partnership, company etc.; Registration as Firm / Company etc.	
II	Architectural Professional Association & Architect Act 1972:	06
	Practice Procedure and conduct, Introduction to the importance of professional organizations like IIA, COA & their Membership & their role in future developments.	
	Architectural Competition – Types, procedures, as per guidelines of the Council of Architecture	
III	Architectural Services:	06
	Conditions of agreement – scope of work, comprehensive architectural services and conditions of engagement, remuneration, professional fees and charges as per norms. Responsibilities and Liabilities of an architect towards the client.	
	task in each of such stage.	
IV	Project Management:	08
	Role of an architect in construction management, Scientific methods of construction management, Objectives and functions of project management, stages of project management (planning, scheduling and organizing). Introduction of PERT (Project Evaluation & Review Technique), Fundamentals of CPM (Critical Path Method) activity, event, float, network construction, time computation, project completion period, resource allocation. Relationship of work, Time & Cost, Cost Analysis in network planning, construction site practices, Inspection and Quality Control.	
V	Business Management & Ethics:	06
	Architect's role in society & Human Values. Use of Ethical theories – Kohlberg's theory, Gilligan theory Consensus and controversy, Environment ethics. Business management, sales promotion, human relations and personnel management. Efficiency studies and performance appraisal, billing, accounting, correspondence, information storage and retrieval. Manpower management, safety and labor laws.	
	TOTAL	30

S.No.	NAME OF AUTHORS / BOOKS/ PUBLISHER	YEAR OF PUBLICATION
1.	V.S.Apte ; Architectural Practice & Procedure	2008
2.	Roshan Namavati; Professional Practice	2008
3.	Council of Architecture; Handbook of Professional Documents	
4.	Dr. P.N.Modi, Sanjeev Modi; PERT and CPM	2009
5.	Dr. B.C.Punmia; Project planning and control with PERT and CPM; Laxmi Publications, New Delhi	

# SYLLABUS FOR B.ARCH. (5 YEARS DEGREE COURSE)

#### 9AR2: SUSTAINABLE ARCHITECTURE

# **B.ARCH.:** 9<sup>th</sup> Semester

Max. Marks: 100

<b>2</b> L		
UNIT	CONTENTS	CONTACT HOURS
Ι	<b>Introduction</b> : Introduction to Sustainability and its various dimensions (economic, social and ecological); Sustainable development of built environment; Global Warming and Climate Change; Concepts in sustainable architecture; sustainable buildings, green buildings, climate responsive buildings, ecological responsive buildings, Energy efficient buildings; Energy policy of India and world.	04
Π	<b>Strategies and Technologies</b> : Solar Passive Design; Recycling/Reuse strategies, optimization techniques, advances in HVAC, Electrical, Lighting and Plumbing technologies; integration of Active energy efficient systems with buildings – PV cells, wind towers, geothermal heat pump, bio-mass energy etc. Study of non conventional energy sources.	06
III	<b>Rating systems</b> : Benchmark: Study of rating systems across globe in general introduction – BREEAM, CASBEE, LEED, detail study of IGBC, GRIHA. Study of energy conservation building codes. Study of LEED/GRIHA rated buildings	06
IV	<b>Materials and Technology</b> : Emphasis on traditional building systems, methodologies and on the use of alternate/substitute and environment friendly materials, to make the students aware of local and / or low cost building materials which are cost effective, environment friendly and appropriate to the context of the site, climate and culture.	08
V	<b>Energy Assessment</b> : Energy calculations through whole building performance method. General introduction about Building information modeling, Introduction to concept and basic software. REVIT at advance level, ArchiCAD, energy plus, green building studio, IEs.	06
	TOTAL	30

S.No.	NAME OF AUTHORS / BOOKS/ PUBLISHER	YEAR OF PUBLICATION
1.	Sustainable Building Design Manual; Tata Energy Research Institute	2012
2.	Green Building Materials; Ross Spiengle & Dru Meadows	2004
3.	Understanding Green Building Guidelines; Traci Rose Rider	2009
4.	Milli Majumdar; Energy Efficient Buildings in India; TERI	2001
5.	Francis D.K.Ching; Green Building Illustrated; John Wille & Sons.	2014

# 9AR3: DISASTER RESISTANT ARCHITECTURE

# **B.ARCH.:** 9<sup>th</sup> Semester

Max. Marks: 100

2L		
UNIT	CONTENTS	CONTACT HOURS
Ι	Introduction to Disasters	04
	Hazard, Risk, Disaster, Vulnerability, Classification of disaster, Man Made & Natural Disasters, High, Medium & Low Impact.	
	Disasters and Factor Causing Disasters, Earthquakes, Tsunami, Landslides, Cyclone, Floods, Fire etc.	
II	Impact of Disasters	06
	Effects of natural and Man-made Disaster, Behaviour of structural and non- structural members during and after disaster, Standards and Norms for risk reduction for various disasters i.e. Earthquakes, Tsunami, Landslides, Cyclone, Floods & Fire.	
III	<b>Pre-Disaster and Mitigation Measures in Disasters</b> Disaster Management Plan, Natural Crisis Management Committee, NDMA (national disaster management authority) Management Guideline, Emergency Support Function, Role of Building information systems in Disaster Management.	06
IV	Design & Planning Solution	08
	Design Guideline and Construction Techniques for disaster resistant structure in RCC, Steel, Stone, Brick & wood; Engineering, Architectural, Landscape and site planning solutions for various disasters, Details for foundation, soil stabilization, retaining wall, plinth, plinth fill, flooring, walls, opening, fenestration and other building components. Study of non engineered Building practices.	
V	Case Studies- Disasters in India	06
	Damaged Caused, Disaster management, Mitigation, post disaster structural up gradation in Earthquakes, cyclones, landslides, floods, droughts and tsunami in India.	
	TOTAL	30

#### SYLLABUS FOR B.ARCH. (5 YEARS DEGREE COURSE)

# 9AR4: ARCHITECTURAL DESIGN-VII

# **B.ARCH.:** 9<sup>th</sup> Semester

Max. Marks: 250

UNIT	CONTENTS	CONTACT HOURS
Ι	Theme: Understanding design to integrate complexities of urban dimensions, Architectural language & expression.	05
Π	<b>Parameters</b> : Urban Networks such as Urban greens, Pedestrian connections, Traffic & Transportation, Local and regional architectural language & expression. Socio-Economic, Cultural and Physical context. Congregation of large number of diverse and unknown people.	05
III	<b>Expected Skills</b> : To develop ability and skill to design building as a urban insert by understanding the influence of the building on and of the immediate & distant surrounding. Handle circulation of large member of people and various modes of Transport.	10
IV	<b>Design Outline</b> : Design of a multi-functional complex programmatic building as an insert at a settlement level ideally on a building site required for a built up area of 5000 – 7500 sqm., Course to be integrated with concurrent courses such as Housing, Urban Design, Conservation, Sustainable Architecture & Disaster Resistance Architecture.	05
V	<ul> <li>Projects: At least one sufficiently large project to be given in a semester from the list of suggested projects in various categories of building types.</li> <li>Housing: Mix Group Housing, Townships, etc.</li> <li>Educational: Large scale educational campus, University, etc.</li> <li>Commercial: District Centre, Technology Parks, etc.</li> <li>Transportation: Bus Terminal, Railway Station, Metro Rail Station, Airport Terminal.</li> <li>Recreation: Multipurpose Indoor / Outdoor Sports complex.</li> <li>Hospitality: Hotel with convention / Exposition facilities, etc.</li> </ul>	110
	TOTAL	135

# SYLLABUS FOR B.ARCH. (5 YEARS DEGREE COURSE)

# 9AR5: DISSERTATION & THESIS SEMINAR

# **B.ARCH.:** 9<sup>th</sup> Semester

#### Max. Marks: 300

UNIT	CONTENTS	CONTACT HOURS
Ι	<b>Research Formulation:</b> The students of the final year are required to undertake research on a topic related to the field of spatial planning on issues emerging out of the present trends and future prospects of the Thesis Project selected.	12
	The Thesis Project should be sufficiently large and complex so that student can demonstrate the Skills and Knowledge acquired during the course.	
	The site selected for the Thesis project should be large enough for a built up area more than 7500 Sqm. The project program can be hypothetical however the site selected should be real. Students may select live projects that have real program and objective.	
Π	<b>Research Design:</b> Once the problem is formulated the student has to undertake extensive literature survey and state in clear terms the working hypothesis. Students are required to state the conceptual structure within which research would be conducted by defining the aim, objectives, scope & limitations of work.	12
III	<b>Research Data:</b> Data shall be collected keeping in mind the cost, time and other resources. Primary data can be collected either through experiment, through survey or by observation such as personal interviews, telephonic interview, mailing of questionnaire or through schedules. Secondary data such as census data, literature studies, unpublished or published thesis or dissertation can be collected.	18
IV	Research Analysis & Report: The analysis of data requires a number of closely related operations such as establishment of categories. The application of these categories to see data through coding, tabulation and then drawing statistical inference. Draw conclusions and identify architectural issues involved in the project design and construction. Define strategy to address these issues in the design proposal. Prepare a report of what has been done. The layout of the report should be as follows: the preliminary pages, the main text and end matter. The preliminary pages carry title, declaration, certificate, acknowledgement, list of illustration &	24
	& methodology. The end matter will include glossary and annexure.	
V	<b>Thesis Seminar:</b> Criteria of selection of the site for the thesis project and justification for how the proposed site will support the conceptual idea for the project. Bylaws, zoning regulators & standards applicable to the project. Analytical studies of building prototypes as a whole or in part comparable to the selected project. Formulation of programme of requirements. Conceptual Site analysis and zoning of activities on site.	24
	TOTAL	90

#### 9AR6: TRAINING PRESENTATION

# **B.ARCH.:** 9<sup>th</sup> Semester

Max. Marks: 250

UNIT	CONTENTS	CONTACT HOURS
Ι	<b>Office Administration</b> : Understanding the basic working system of an Architect's office. Duties & Responsibilities of an Architect. Hierarchy of office staff in various types of Architectural practices. Log-Book with recordings of daily activities of the trainee involved in the office. Preparation of project / presentation reports, Bill of quantities and minutes of meetings with clients / consultants / contractors for the on-going projects undertaken by the office.	6
ΙΙ	<b>Presentation &amp; Submission Drawings</b> : At least one set of presentation drawings of a project prepared for the approval of the client and one set of sanction drawings of a project prepared for approval of the Local authority by the student in Architect's office.	6
III	Site Visits and Studies: Visits to construction sites of the on-going projects in the Architect's office for the purpose of checking the accuracy of work or to record progress of work on site and related studies undertaken as per the directions of the supervising architect.	6
IV	<b>Critical Appraisal</b> : Critical appraisal of a completed building project designed by the Architect / Firm or on-going project on which the student has worked in the office. The appraisal may be done on the design issues such as functional efficiency, visual appeal, climatic response, Green rating, etc. either one of the parameter or combination there off.	6
V	Working drawings & details: Preparation of good for construction <i>building drawings</i> such as plans, sections, elevation etc., <i>space details</i> such as stair case, toilets, lifts, etc., <i>fixing details</i> such as wall cladding, balcony railing, structural glazing, etc., <i>construction details</i> such as plinth, sill, lintel, parapet, etc., and <i>Fabrication details</i> such as door, windows, grills, etc. under the guidance of supervising architect.	6

# 9AR7: ELECTIVE-IV (URBAN DESIGN)

# **B.ARCH.:** 9<sup>th</sup> Semester

Max. Marks: 100

UNIT	CONTENTS	CONTACT HOURS
Ι	Introduction	5
	Introduction to Urban Design, its principles and techniques; History of Urban Design; Inter-relationship between Architecture, Urban Design and Urban Planning in terms of scale, time and scope; Introduction to urban legislation and policies.	
II	Terminologies and Theories	10
	Urban Design Vocabulary; Elements of Urban Design; Theories introduced by various urbanists - Kevin Lynch, Jane Jacobs, Gordon Cullen, Aldo Rossi; Concept of Urban Redevelopment, Renewal and Regeneration	
III	Methods and Techniques	10
	Importance of context in Urban Design-Context analysis, Regional study and Project understanding; Impact of factors such as economy, politics, religion and region on urban design; Mapping and analytical tool- Figure-ground mapping, Activity mapping and Cognitive mapping.	
IV	Urban Issues and Theories of New Urbanism	10
	Urban sprawl, Gentrification, Social exclusion in terms of age, gender, class, caste etc.; Concepts of New Urbanism – Sustainable Urbanism, Inclusive City, Neighborhood Planning, Futuristic City, Walkable Neighborhood, Smart city etc.	
V	Urban Design Responses	10
	Study of urban projects by eminent urban designers; Urban design exercise.

### **10AR1: THESIS PROJECT**

# **B.ARCH.:** 10<sup>th</sup> Semester

Max. Marks: 500

UNIT	CONTENTS	CONTACT HOURS
Ī	Analysis and Concept: In this stage students shall analyze their site to arrive at a zoning of Activities on site. Student is required to Analyze the characteristic features and context of the site including Climatic analysis at both micro and macro level. Drawings, sketches, and physical models necessary to explain circulation, Organization of spaces and form composition shown in Preliminary drawings and study models.	24
Π	<b>Concept Development</b> : In this stage students shall present the overall scheme of their project in two dimensional drawings and three-dimensional model. Site plan and sections showing circulations, built and open spaces. Building plans showing integration of building elements, space, form and Structure. Building Sections showing integration of building elements, space, form and Structure in Section. Building Elevations showing massing & projections.	36
III	<b>Design Development</b> : In this stage students shall develop their conceptual schemes further as per the comments in the previous reviews. Drawings namely, site plan, building plans showing circulation, built & open, furniture layout and sections & elevations showing massing, edges & surface articulation along with structure and services integration to an appropriate scale. Revised building / site model.	42
IV	<b>Pre-Final Design</b> : The pre-final design stage must cover all the aspects of design covered in the previous stages in the light of comments offered by the thesis guides and examiners from time to time. In addition to this the students are required to submit revised building/site model.	42
V	<b>Final Design</b> : A final set of drawings in the form of a portfolio containing plans, sections, elevations, views / perspectives, 3 copies of the reports in original and CD containing all this to be submitted at this stage to their respective guides for external jury.	36
	TOTAL	180

Max. Marks: 100

<b>4S</b>		
UNIT	CONTENTS	CONTACT HOURS
Ι	<b>Identification</b> : Identify electrical services for outdoor and indoor spaces. Identify the type of building & electrical supply sources & components and mandatory provisions.	04
ΙΙ	<b>Design Calculation</b> : Evaluate power requirements for all services like lighting, HVAC, Fire, Lifts, Escalators and other building equipments.	08
III	<b>Concept &amp; Analysis</b> : Identify Electrical system requirement on the basis of load calculations by studying similar cases. Study of National Electrical Code and ECBC. Identification and provision of alternative energy sources for specific requirement. Determine requirement of lighting as per National lighting code for various activities. Drawings showing light zoning diagrams, single line diagram showing distribution system and its components at site and building level.	12
IV	<b>Design Synthesis</b> : Electrical services design in coordination with various services such as water supply, sewage, lighting, heating & cooling along with landscape planting plan.	16
V	<b>Design Presentation</b> : Drawing showing electrical layout – Power and LV layouts, Wall electrical layouts, Electrical reflected ceiling layout, IBMS provisions. Drawing showing light fixtures, layout & connections in plan and section with specifications such as Type and Number of lamp / luminaries, their lux level and lighting system.	20
	TOTAL	60

S.No.	NAME OF AUTHORS / BOOKS/ PUBLISHER	YEAR OF PUBLICATION
1.	S.L. Uppal- G.C. Garg; Electrical Wiring Estimation and Costing; Khanna Publication	2010
2.	Fred Hall & Rager Greeno; Building Services Handbook; Butterworth-Heinmann	2011
3.	Raina K.B. & Bhattacharya S.K.; Electrical Design, Estimation and Costing; New Age International Publishers, New Delhi	2007
4.	Steve Doty & Wayne C. Turner; Energy Management Handbook; The Fourmount Press, USA	2009

UNIT	CONTENTS	CONTACT HOURS
Ι	<b>Identification</b> : Identify Mechanical Services for different spaces and activities. Find out area of conditioned spaces and non conditioned spaces.	04
Π	<b>Design Calculation:</b> Identify system requirements for various mechanical services (HVAC, Fire, Vertical Circulation) and evaluate the requirement through heat load calculation, waiting time calculation etc.	08
III	<b>Concept &amp; Analysis</b> : Identify mechanical system through analysis of similar cases and manuals such as ECBC, NBC and ASHRAE.	16
IV	<b>Design Synthesis</b> : Preparing Mechanical System Design in Coordination with interior furniture, water supply, sewage, electrical, lighting & sound reinforcement system.	12
V	<b>Design Presentation</b> : Drawing showing concept of minimizing various loads. Design showing HVAC, Fire, Vertical Circulation showing all its components, their capacity, number, location, size, etc in plans & sections with specifications at site & building level.	20
	TOTAL	60
